

MOHAMMAD ZAKI MALLA

FULL-STACK DEVELOPER

Damascus, Syria | buzakimalla@gmail.com | +963 959 311 217

[zaki-malla.github.io](#) | [LinkedIn](#) | Date of birth: 8 January 2004

PROFILE

Full-stack developer with experience building business systems, customer-facing applications, and responsive websites. Sole developer of Wassiili, an ongoing platform for a private organization. Experience with ASP.NET Core MVC since June 2025, relational database design, Flutter, and bilingual web interfaces. I use AI to support structured planning, efficient implementation, and review of technical decisions.

EXPERIENCE & SELECTED PROJECTS

Wassiili | Sole Full-Stack Developer

Jun 2025 - Present

Private organization | Operations platform

- Independently developed an ASP.NET Core MVC and SQL Server system spanning customer orders, pricing, purchasing, shipments, payments, and employee workflows.
- Developed administrative interfaces, role-based access, API endpoints, reports, and financial workflows using C#, Entity Framework Core, and ASP.NET Identity.

SRDA | Institutional Website & CMS

Sep 2026

Completed design and development in 10 days

- Designed and developed a responsive Arabic-English institutional site with RTL/LTR layouts, public pages, news, media, and an interactive Syria detention map.
- Developed a custom content management system with PHP API and MySQL, including administrative security controls and SEO metadata.

Wassiili Mobile | Flutter Developer

Apr - Jun 2026

Customer mobile application | Approximately 2.5 months

- Built a Flutter app for browsing products, submitting carts for pricing, approving orders, wallet payments, and notifications.
- Connected customer journeys to the Wassiili backend through authenticated ASP.NET Core APIs, Riverpod, and secure token storage.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core MVC, ASP.NET Core API, Entity Framework Core, ASP.NET Identity, REST APIs

Data: SQL Server, MySQL, relational database design, reporting data models

Frontend & Mobile: React, TypeScript, HTML, CSS, Tailwind CSS, Flutter, Dart, Riverpod, responsive and RTL/LTR interfaces

AI workflow: Objective definition, implementation planning, context preparation, output review

EDUCATION & LANGUAGES

Informatics Engineering, Artificial Intelligence specialization | Arab International University (AIU) | Expected graduation: 2027

Languages: Arabic (native); English (working proficiency)
